

Exhibit C - LinkedIn Screenshot (Albany, Oregon Reference) and Defendant commentary.

Screenshot forwarded to Defendant by a third party, listing “Albany, Oregon” under Caleb Owens, a presumed relative identified as “lead technical developer.”

Relevance: The only Oregon reference was incidental, came from a third party, and was not emphasized by Defendant. Undercuts Plaintiff’s claim of “express aiming” at Oregon under *Walden* and *Calder*. Contributed to confusion surrounding true owner of product.

Plot twist! Clip Gate just got even weirder. The woman in my profile pic (which I'm about to update)... Turns out she's likely just an influencer or affiliate. One of my followers did some digging and the real owner of @elegangeandgeekery is Kursten Owens, and the "lead product developer" is Caleb. So the REAL thief is, unsurprisingly, a white man. My guess? He stole the idea and spoonfed it to her without telling her. Now she's stuck cleaning up the mess while he plays puppet master.
